VENETIAN BLINDS Made to Order All-steel Construction

Good-looking, easy to operate. Use them wherever you want to cut down glare and drafts — regulate light and air intake. Metal-enclosed head with levelor tiltor — worm-gear mechanism tilts slats — desired. Positive automatic lock holds blinds at any height. 2-in. slats of flexible, curved steel — rust-resistant.

Slats and head finished in washable, baked-on, eggshell-color enamel. Duck tape in 8 colors — blue, chocolate, eggshell, black, green, mulberry, red, or natural mingled.

IMPORTANT — Measure each window for possible variations. Be accurate — use yard stick or metal rule.

HOW TO HANG BLINDS — Hang OUTSIDE casing (face of frame) or INSIDE casing (between jambs). Inside looks better — blinds hang flush with frame.

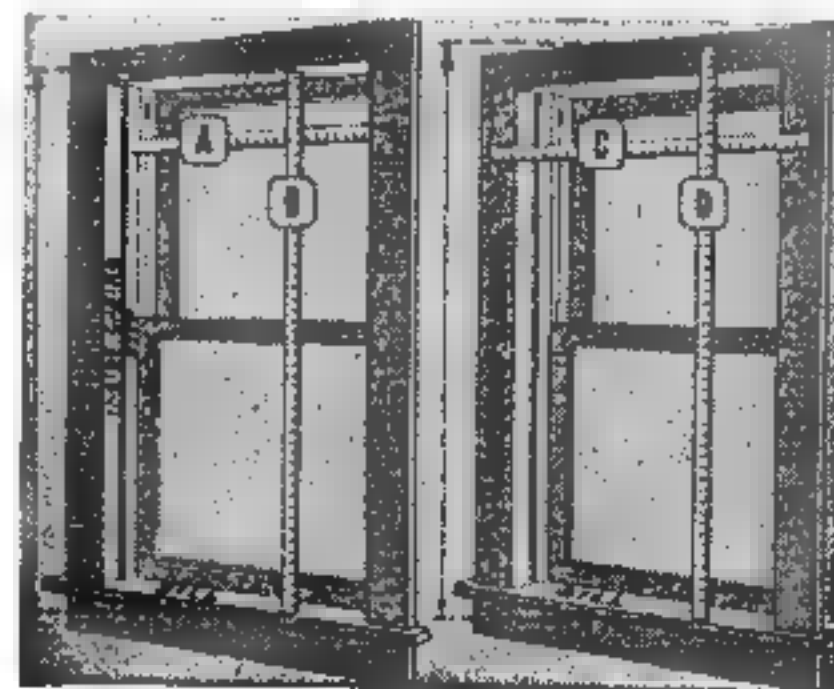

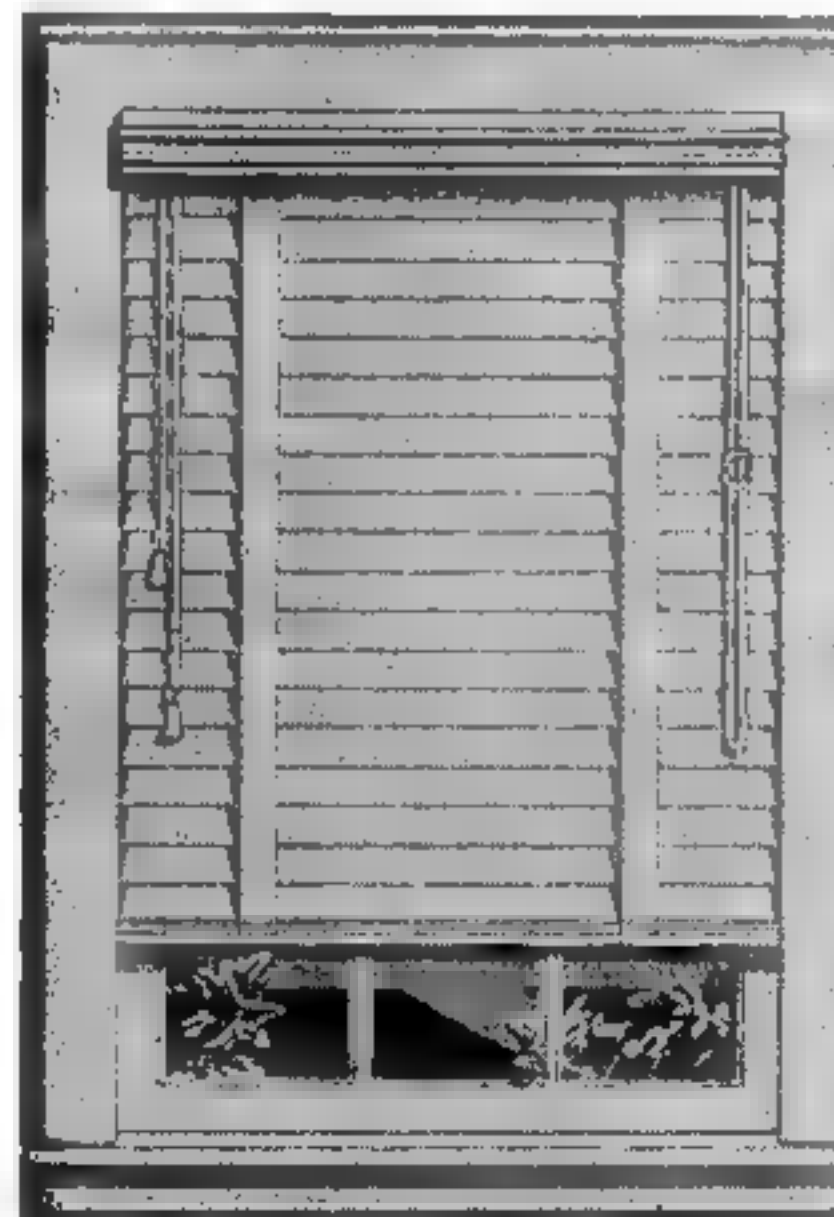

MEASURING FOR INSIDE HANGING — See Sketch A-B below. **WIDTH (A)** — exact distance between points on top inside casing where brackets are to be. At least one inch flat surface required to fasten brackets. Do not allow for brackets in your measurements — this is done by manufacturer. **LENGTH (B)** — distance from top inside casing to window sill.

TO HANG OUTSIDE CASING — Sketch C-D (right). **WIDTH (C)** — distance between points on top outside casing where brackets are to be. **LENGTH (D)** — distance from bracket at top to sill or desired point below.

CAUTION — Check your measurements before sending your order.

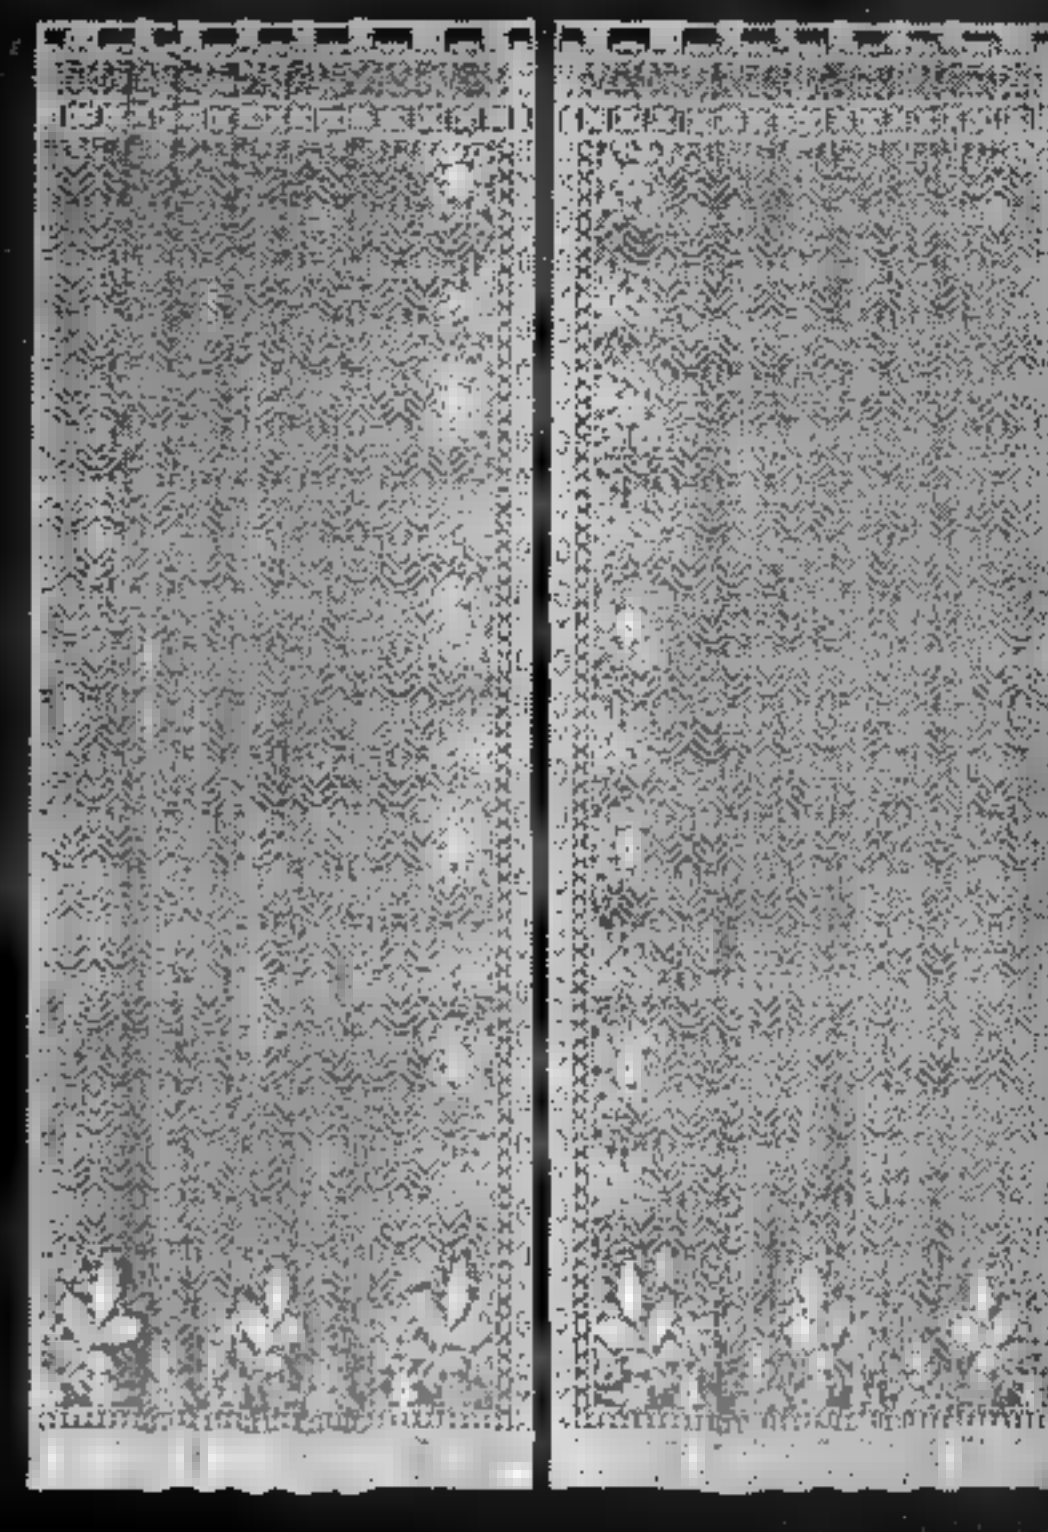

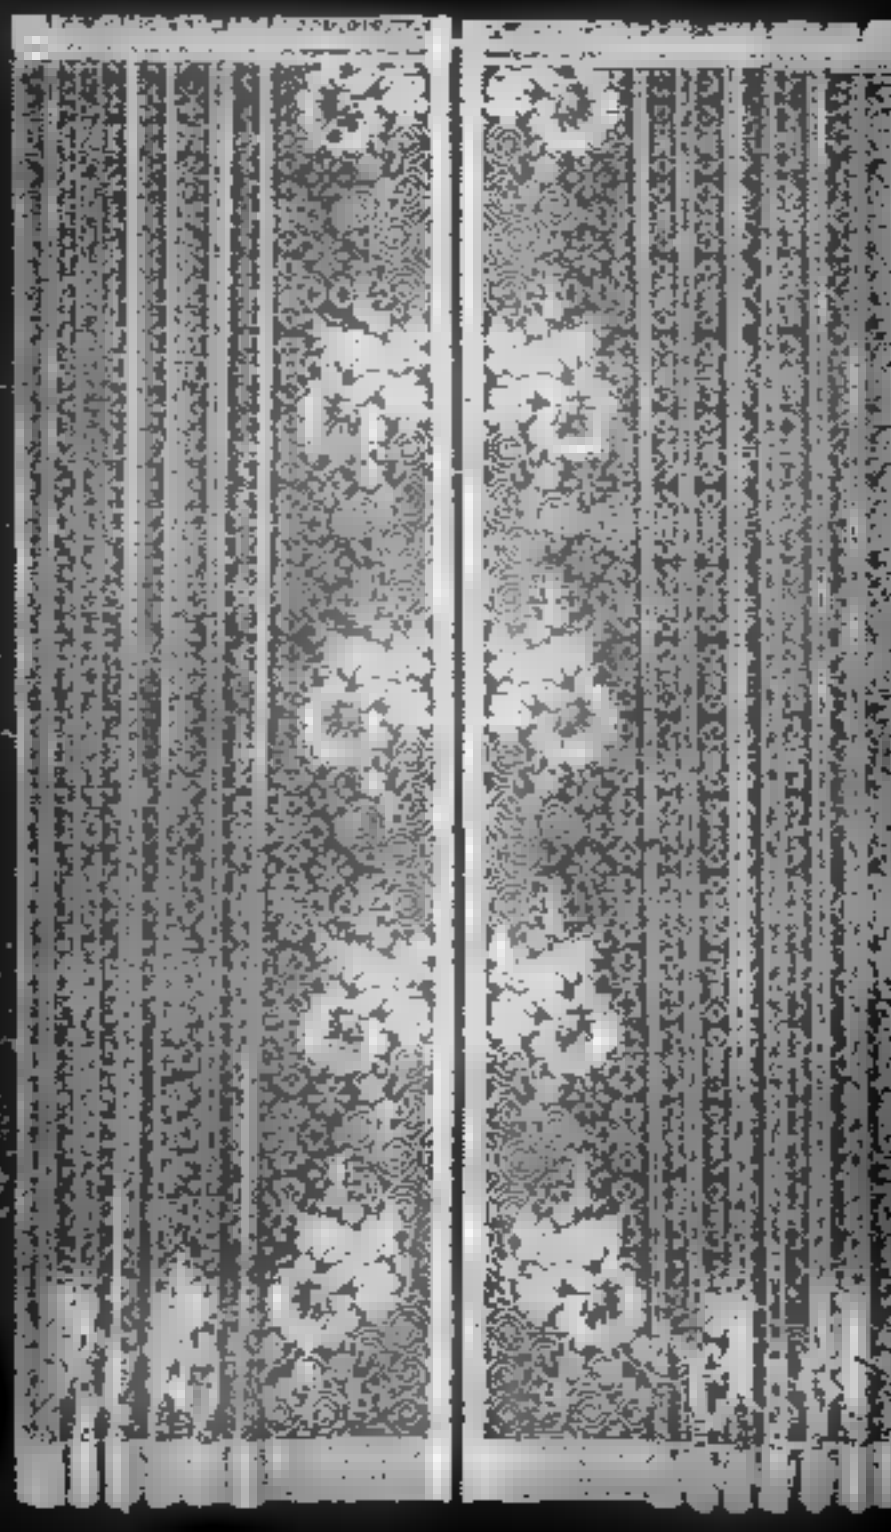

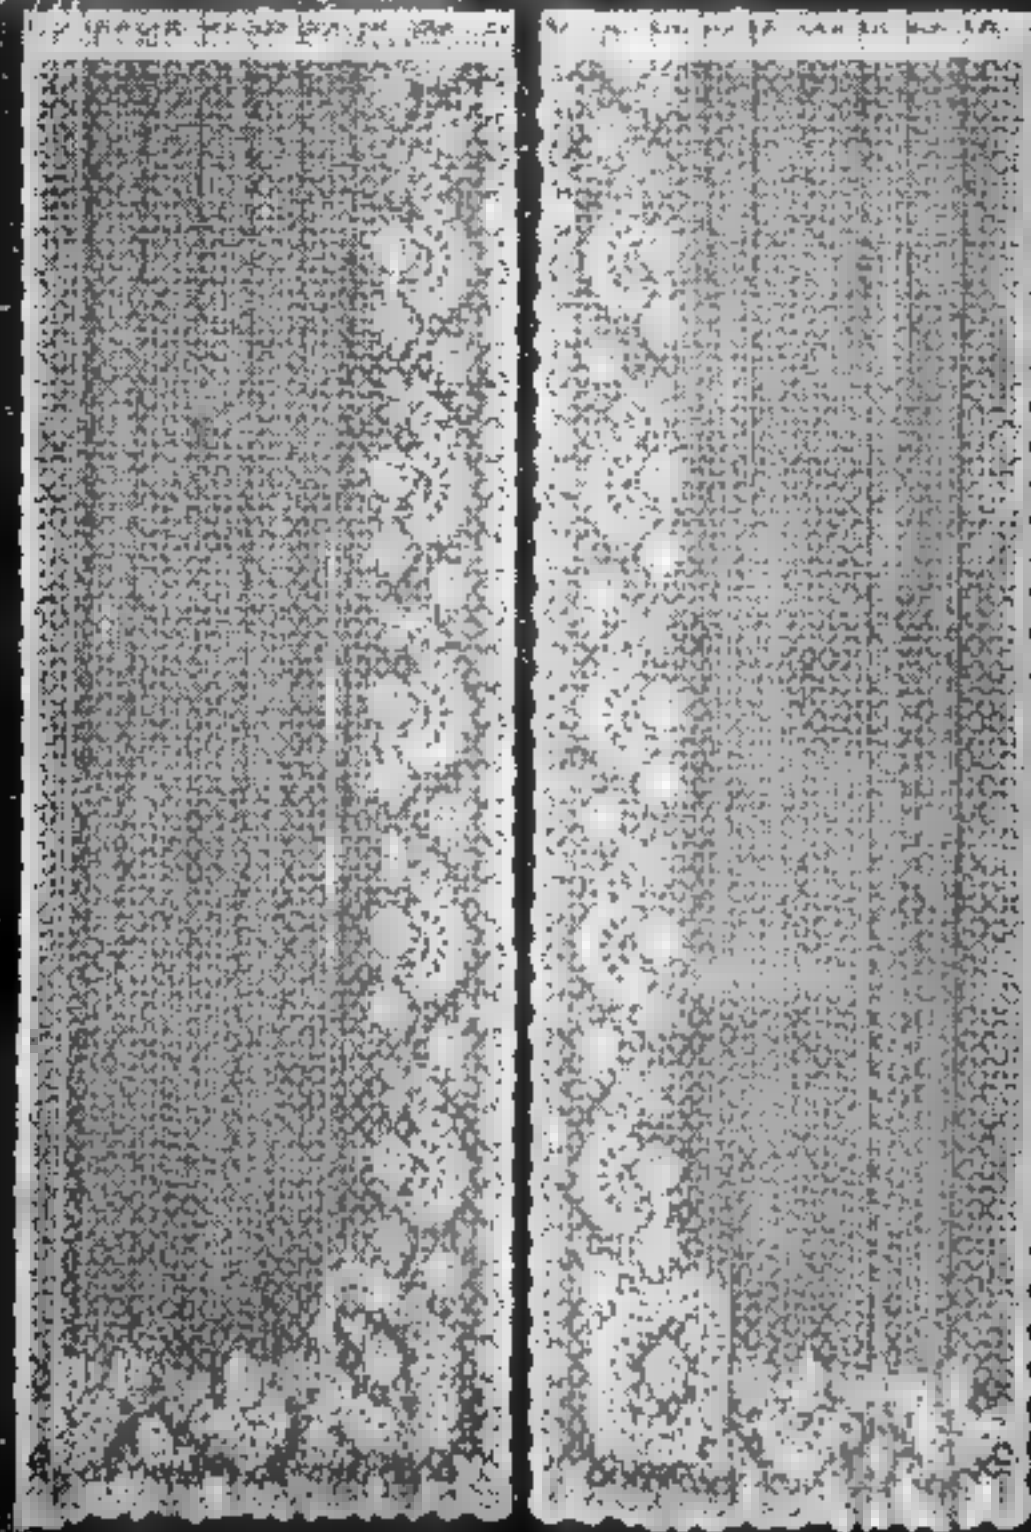

WHEN ORDERING — State which is Width and Length — whether INSIDE OR OUTSIDE INSTALLATION — and First and Second Choice of Tape Colors.

Allow 21 days for shipment from factories — Cleveland, O., Chicago, Ill., or Ozone Park, N. Y.

Automatic Mixfinder Dial plainly indicates ten everyday mixing needs.
